(included w/trim)

B-9 Pilaster
8 1/2" (Fluted)

Mullion Casing

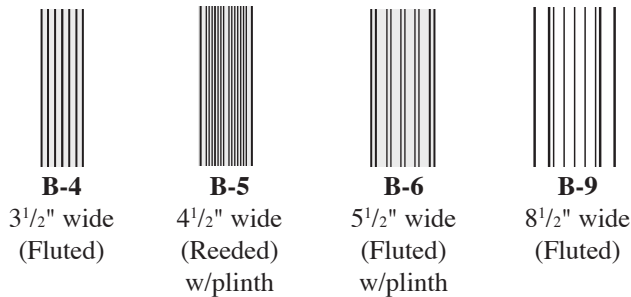

NOTE: Items priced in *italics* are Factory Order - Please allow additional lead time.

How to select Entrance Trim

1. Determine which application configuration you have.

2. Then determine which pilaster design you prefer.

• Any of the designs can be used for "A", "B" or "C" applications.

3. For configuration "A" select basic trim (B-4, B-5, B-6 or B-9 **3'-0"**).

For configuration "B" and "C" select basic trim (B-4, B-5, B-6 or B-9 **6'-4"**).

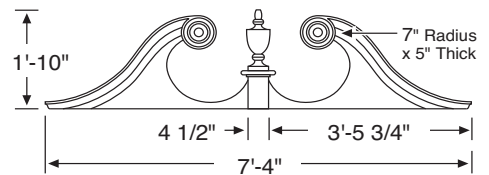

4. Select the head(s) that best suit the architectural style of your home.

B-3D
Dentil Head
(for use w/B-9 Trim only)
"A" ONLY

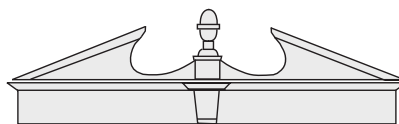

B-6D
Dentil Head
"B" & "C"

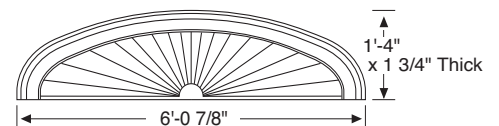

B-6R
Ram's Head (Adjustable)
"B" & "C"

B-3F
Frieze Board
(Adjustable)
"A"

B-6P
B-6F
Pediment Head with Frieze Board
(Adjustable)
"B" & "C"

B-6S
(3'-0" Door w/1'-0" Sidelights only)
"B"

B-3P
Pediment Head
(Adjustable)
"A"

How to measure:

1. **Measurement "A" = width of opening.**

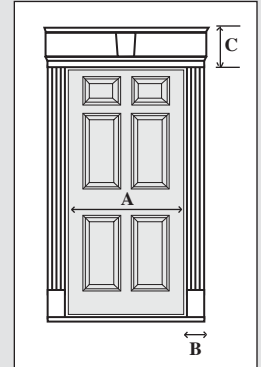

Measure width of opening from jamb to jamb plus 1" (1/2" each side).

2. **Measurement "B" = width of pilaster desired.**

Measure from desired reveal on jamb (usually 1/2") out 3 1/2", 4 1/2", 5 1/2" or 9 1/2" depending on which pilaster design you select.

3. **Measurement "C" = height of head(s).**

Measure up from desired reveal at top jamb (usually 1/2").

• For shelf only, allow 2³/₄".

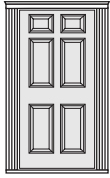

• For shelf and frieze board allow 10³/₄".

• For shelf and pediment head allow 1'-3¹/₄" when using 3'-0" widths, 1'-6¹/₈" when using 6'-4" widths.

• For shelf, frieze board and pediment head allow 1'-11¹/₄" when using 3'-0" widths, 2'-2¹/₈" when using 6'-4" widths.

5 1/2" (Fluted)
w/Plinth Blocks

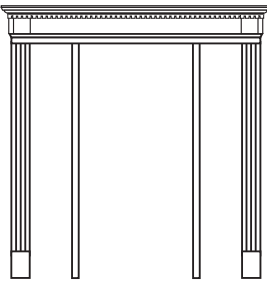

B-9 Pilaster
8 1/2" (Fluted)
w/Plinth Blocks

BASIC TRIM

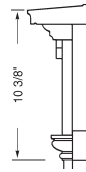

Adjustability: The top shelf trim can be cut down if needed. Cut approximately 1 1/2" off from the end, then remove material needed for adjustment, glue and tack on the 1 1/2" end piece.

Cross blocks can be adjusted →

B-6D

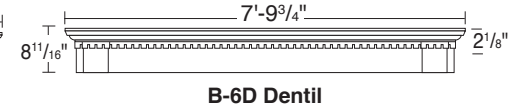

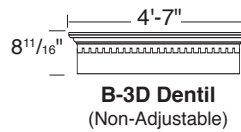

Due to adjustment, pilaster placement can vary for differing frame sizes.

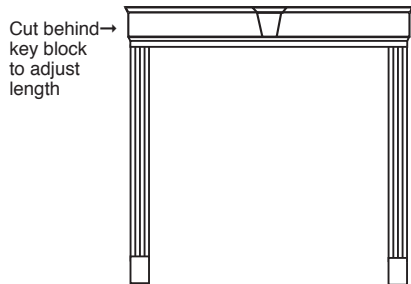

DENTIL HEAD

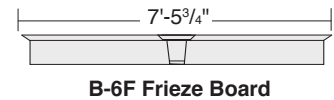

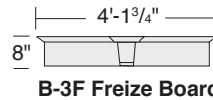

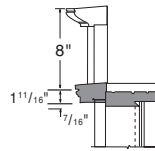

The cross blocks on the B-6D head can be placed to line up with the pilaster capital.

B-3F & B-6F

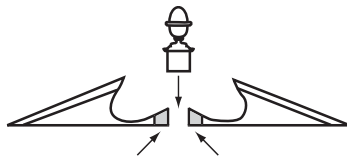

Frieze Board head can be adjusted by cutting the head backboard where it touches the finial base.

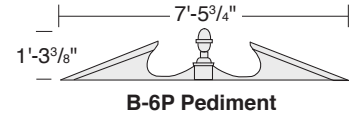

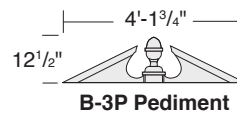

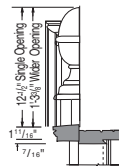

B-3F and B-6F FRIEZE BOARD HEAD

Adjustability: To adjust the frieze board head to your specific unit dimensions, cut directly behind the Key-Block. By removing material to the frieze board head then apply Key-Block.

B-3P & B-6P

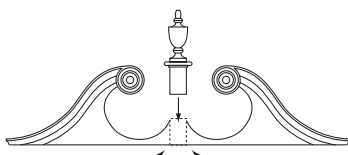

Cut equal amounts here to reduce size of pediment head

B-3P and B-6P PEDIMENT HEAD

Adjustability: The Pediment Head can be adjusted by cutting equal amounts off the backboard where it meets the finial base.

B-6R

Cut equal amounts here to reduce size of ram's head

B-6R RAM'S HEAD

Adjustability: Ram's Head can be adjusted by cutting head back board at finial base. (Standard width of 88" accommodates up to a 3'-0" single door with two 1'-6" sidelights, or a 6'-0" double door. Minimum width for adjustment is 75" which will accommodate 3'-0" door units with two 10" sidelights, or a 5'-0" double door.)

NOTES: * Any adjustments are made on the job site at time of installation.
